Google Console Setup

Step 1 – go to this link (https://console.cloud.google.com) and Login with same email id that you logged in youtube studio.

Create Oauth Consent Screen

Go to Oauth Consent Screen and Choose "External"

OAuth consent screen

Choose how you want to configure and register your app, including your target users. You can only associate one app with your project.

User Type

○ **Internal** ❓

Only available to users within your organisation. You will not need to submit your app for verification. Learn more about user type ⬈

○ **External** ❓

Available to any test user with a Google Account. Your app will start in testing mode and will only be available to users you add to the list of test users. Once your app is ready to push to production, you may need to verify your app. Learn more about user type ⬈

CREATE

After this Enter App Name as your wish Ex."xyz". And Select Email from Dropdown.

Edit app registration

App information

This shows in the consent screen, and helps end users know who you are and contact you

App name *

xyz

The name of the app asking for consent

User support email *

7000sonidhruvit@gmail.com

For users to contact you with questions about their consent

Then Skip all things and at the bottom enter your Email in Developer Contact Information and Hit button to Save and Continue.

## Developer contact information

Email addresses *

abc@gmail.com ✕ |

These email addresses are for Google to notify you about any changes to your project.

SAVE AND CONTINUE   CANCEL

Next we need Youtube Data API v3 scope for that click on ADD OR REMOVE SCOPES. And Add Filter Search "Youtube Data API v3".

| API ↑	Scope	User-facing description
YouTube Data API v3	.../auth/youtube.readonly	View your YouTube account
YouTube Data API v3	.../auth/youtube	Manage your YouTube account
YouTube Data API v3	.../auth/youtube.force-ssl	See, edit and permanently delete your YouTube videos, ratings, comments and captions
YouTube Data API v3	.../auth/youtubepartner	View and manage your assets and associated content on YouTube
YouTube Data API v3	.../auth/youtubepartner-channel-audit	View private information of your YouTube channel that is relevant during the audit process with a YouTube partner
YouTube Data API v3	.../auth/youtube.upload	Manage your YouTube videos

Select This.

Then Hit Update Button.

And Save and Continue.

Skip Test Users and Click Save and Continue.

Check Summary then Click Back to Dashboard THAT'S IT.

Step 2 – Create a New Project, enter project Name as your wish. Ex – "SocialModerationFlagger".

Step 2 – Now go to "Enable APIs and Services" and search Library "youtube data api v3".

Q   youtube data api v3   ✕

1 result

▶ **YouTube Data API v3**
Google

The YouTube Data API v3 is an API that provides access to YouTube data, such as videos, playlists, and channels.

Click on it and Enable this Api with click on "Enable" button.

Step 3 – Now go to Credential Page and click on "Create Credential Button".

Credentials   + CREATE CREDENTIALS   🗑 DELETE   ↩ RESTORE DELETED CREDENTIALS

Create credentials to access your enabled APIs. Learn more ⎘

And Select Oauth Client Id.

Step 4 – Choose Application "Type Desktop app" and enter name. after this popup appears.

Click on Download JSON.

Desktop client 2

Client ID

Client secret

Creation date

Status   ✓ Enabled

⬇ DOWNLOAD JSON

CLOSE

This JSON file is your Client_Secret.json File

Now We also need Service Account Key File so for that follow below process

Step 1 – Click Create Credential and then Click Service Account.

Step 2 – Enter Name as your wish, automatically Service account Id is Generate.

← **Create service account**

① **Service account details**

Service account name

Display name for this service account

Service account ID *   ✕ ↻

Email address: <id>@graphite-byte-375006.iam.gserviceaccount.com ▢
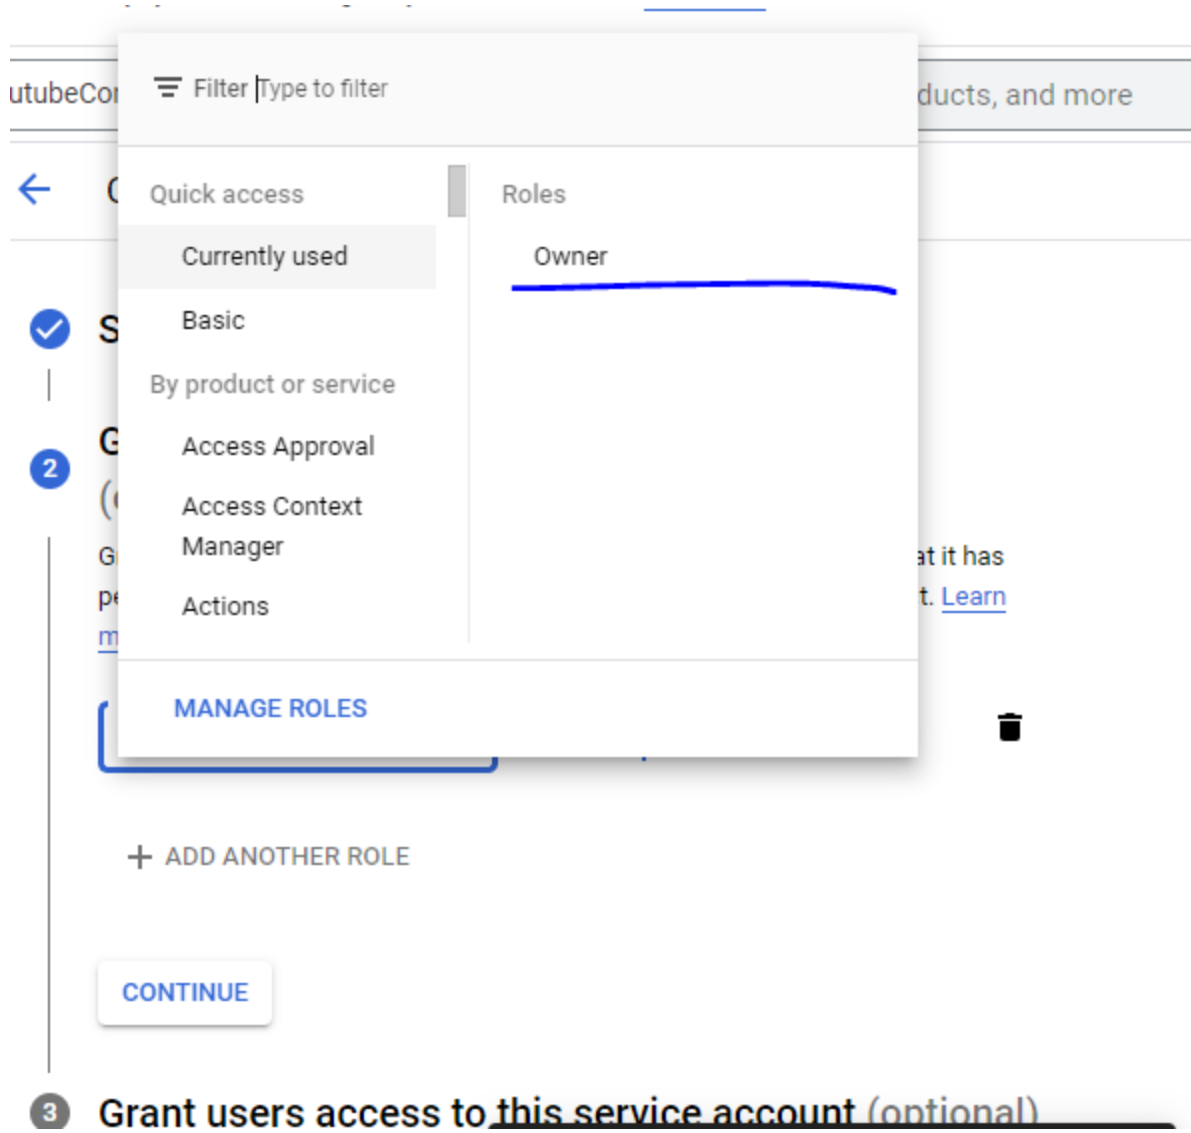

Service account description

Describe what this service account will do

CREATE AND CONTINUE

② **Grant this service account access to project**
(optional)

③ **Grant users access to this service account** (optional)

Select role as Owner

And Skip the "Grant users to this service account" Beacause you don't need to give this details Just Click Done.

Step 3 – Click on your Service Account

Click on Keys:

Click on "Create new Key" and select type JSON and then hit the Create button. This is your Service Account File.

Upload this two File on Social Moderation Flagger and Handle Your Social Account in smart way.

Main Important think – "IN YOUTUBE STUDIO GO TO SETTINGS<PERMISSIONS<INVITE" Invite this Email parammediaflagger@gmail.com.
